## acute toxicities of organic pdf

acute toxicities of organic pdf Toxicity is the degree to which a chemical substance or a particular mixture of substances can damage an organism. Toxicity can refer to the effect on a whole organism, such as an animal, bacterium, or plant, as well

## Acute Toxicities Of Organic Chemicals To Fathead Minnows

organics toxicities tests, the cell death rate was similar to the bioluminescence inhibition rate. These results indicated that organics acute toxicities to *V. fisch-eri* could reflect the death of cell, but metals acute toxicities to *V. fischeri* may not lead to the death of cell, just represent the bioluminescence inhibition.

A group contribution method has been developed to correlate the acute toxicity (96-h LC50) to the fathead minnow (*Pimephales promelas*) for 397 organic chemicals. Multilinear regression and computational neural networks (CNNs) were used for model building. The models were able to achieve a fairly good correlation of the data ( $r^2 > 0.9$ ).
