Biology - Pearson

One of the greatest scientific feats of our era is the astonishing progress made in understanding the intricate machinery of life. We are living in the most productive phase so far in this quest, as researchers delve ever deeper into the workings of living systems, turning their discoveries into new medical treatments, improved methods of growing food, and innovative new products.

Biology: The Science of Life | The Great Courses

A cell is the basic unit of life. All living things are made up of cells (plants, animals, and bacteria). These organisms can be either one-celled or multicellular. Most cells are so small that they cannot be seen without a microscope. In multicellular organisms, cells are specialized to carry out different functions to sustain life.

biology curriculum middle school - National Park Service

Biology: Science for Life weaves a compelling storyline throughout each chapter to grab student attention through the exploration of high-interest topics such as genetic testing, global warming, and the Zika virus. The authors return to the storyline again and again, using it as the basis on which they introduce the biological concepts behind ...
