My guess is that massive spending cuts for government-sponsored science and health research, along with

what appears to be Trump's generally indifferent stance toward scientific progress (except as manifests itself in "infrastructure"), will more than offset whatever benefits lax drug controls might have over the long run.

### **Global Carbon Dioxide Emissions and Climate Change 2018**

Debt is an efficient tool. It ensures access to other peoples' raw materials and infrastructure on the cheapest possible terms. Dozens of countries must compete for shrinking export markets and can export only a limited range of products because of Northern protectionism and their lack of cash to invest in diversification.

### **Structural Adjustment "a Major Cause of Poverty" Global Issues**

It kind of works now, but it doesn't work historically, because it is the product of two entirely separate movements. The first is the one David Friedman describes above, which developed the free-market ideas through the seventies and eighties (and probably before).
