neuroanatomy in clinical context pdf

Face perception is an individual's understanding and interpretation of the face, particularly the human face, especially in relation to the associated information processing in the brain.. The proportions and expressions of the human face are important to identify origin, emotional tendencies, health qualities, and some social information.

Face perception - Wikipedia

For the purpose of this article, research on meditation concerns research into the psychological and physiological effects of meditation using the scientific method. In recent years, these studies have increasingly involved the use of modern scientific techniques and instruments, such as fMRI and EEG which are able to directly observe brain physiology and neural activity in living subjects ...
